**PROGRAM**

John Tobin Energy

His book is aptly titled "Confessions of an Energy Price Forecaster: A 12 Step program to Enlightenment"

John is an enlightened and entertaining speaker who brought so many interesting facts of the energy environment to us, that he agreed to come back to answer all the questions we had.

Energy is an efficiency issue of what goes in the exhaust and up the stack.....his 13<sup>th</sup> step tells us that Energy, Economy and Environment ate all linked.

One interesting question he asked of us.....who recently bought a new energy efficient refrigerator....? Who moved the old one into the garage for beer and more food...?

Investors look to the Wind and Solar emerging companies, and for dividends companies such as Exxon.
