**THE PRESIDENT'S CORNER**

Thanks to my wife Linda, for being Asst. Asst. Sgt at Arms on Wednesday. She did good job and I did pay later for the tacky remark that I made.

## **PROGRAM**

Brian Richter, U.S. Capital Energy

Another great program energy related....it is a hot topic. Brian is a geologist with his own company working on natural gas exploration in the US and Latin America. Geologists as Brian explained search for resources, manage impacts on the environment and plans for the future.

He discussed consumer expectations for supply....that development be reliable, done responsibly and efficiently. In Colorado the Natural gas industry was \$10B in 2005/06, for this year it is expected to be \$15B.

His conclusions: Knowing what we don't know...there are undiscovered energy resources and with technical advances being made all the time.....the future looks good, our energy supply can be expanded!
